

AKtive[®]

 **ITALY**

Ophthalmic Instruments

catalogue 2019 / *Part II - Reusable instruments*

Focused on Future

AKtive® Ophthalmic Instruments

Aktive® is a medical device manufacturing company located in Rome, Italy. **Aktive®** has been in the distribution business since 2007; by incorporating the company Meditekno in 2011, **Aktive®** achieved over 30 years of experience in manufacturing microsurgical instruments for posterior and anterior procedures. Starting from 2012, all the interests have been focused on developing a new line of disposable and semi-disposable instruments.

Aktive® produces the finest instruments using modern machining methods with hand finishing by highly skilled instrument makers. Our rigorous quality assurance system meets the requirements for many international controls including ISO 13485:2012 and CE marking, ensuring a consistent production line.

Without losing its artisan origins, **Aktive®** leaves open the possibility of manufacturing prototypes from ideas which are geared towards specific surgical requirements.

Our Mission

we

would like to provide the highest quality products at a very competitive cost through the use of innovative solutions.
